

## Launch of a new product effisin CG

Products

02-2019 / SAI

Dear Customer,

**We are proud to announce the launch of our newest product: effisin CG.**

**effisin CG** is our new personal care single active **Caprylyl Glycol**.

**effisin CG** is a semi-liquid antimicrobial stabilizer which is mild to the skin and practically odourless and colourless. The active is stable to hydrolysis and temperatures up to 120°C.

effisin CG can be used in leave-on and rinse-off applications with a broad pH range and is globally approved.

schülke recommends a use concentration of 0.3 -1.0 % in all cosmetic applications.

If you are interested in our new active and would like to receive more information, please contact us.

Kind regards,

The Matis Specialties-team

---
